

Harini Sivanathan

AI & Data Science Developer | Backend + ML

B.Tech AI & Data Science – 4th Year | CGPA: 8.2 | 12th: 76% | 10th: 100%

+91 9965954747 · harinisivanathanvs@gmail.com · Karur, Tamil Nadu

SUMMARY

B.Tech student in AI & Data Science (CGPA 8.2) with hands-on experience in Python, Java, SQL, REST APIs, FastAPI, and Docker. Completed 3 internships across web development, AI in telecom, and machine learning. Built production-ready NLP chatbots, RAG pipelines, and autonomous agents. Eager to apply backend and AI problem-solving skills to real-world business challenges.

TECHNICAL SKILLS

Languages:	Java, Python, C
Databases:	MySQL, SQL, PostgreSQL – queries, schema design
Backend:	REST APIs, FastAPI, Node.js, AWS, Render, Google Cloud
Frontend:	React, HTML, CSS, JavaScript
Tools:	Git, GitHub, Docker, Kubernetes, VS Code
AI / ML:	Machine Learning, Deep Learning, NLP, RAG, LangChain, Autonomous Agents
Concepts:	OOP, DSA, DBMS, Unix

INTERNSHIP EXPERIENCE

Web Development Intern MAXCO Systems, Coimbatore · Tech: React, REST APIs, Zoho CRM • Developed full-stack web applications using React (front-end) and back-end REST APIs. • Built Zoho CRM integration module automating lead management and customer data synchronization.	Jun 2024 – Jul 2024
AI in Telecom Intern Andrew Amphenol · Tech: Python, Docker, Kubernetes • Developed AI-driven network fault detection system using Python & Docker, deployed on Kubernetes. • Tested and analyzed telecom networks including fiber optics, RF systems, and structured cabling.	May 2025 – Jul 2025
Machine Learning Intern MaxScope · Tech: Python, NLP, FastAPI, REST API, SQL • Built and deployed Chennai Marathon Chatbot – full-stack NLP conversational system for real-time updates. • Coordinated ML project tasks ensuring adherence to engineering standards and quality guidelines.	Dec 2025 – Jan 2026

PROJECTS

Chennai Marathon Chatbot – MaxScope Team Project · Python NLP REST API SQL • Full-stack NLP chatbot for real-time marathon updates on schedules, routes, FAQs with intent recognition. • Deployed at MaxScope; integrated NLP pipeline with REST API backend for live query handling.	2025
Medical Symptom Intelligence System (RAG + ML + Safety) Individual Project · Python RAG LangChain Scikit-learn FastAPI Docker • AI diagnostic assistant predicting conditions from user symptoms with NLP & ML and safety guardrails. • End-to-end RAG pipeline combining ML classifiers with LangChain retrieval and FastAPI deployment.	2025
SentinelX – Autonomous Infrastructure Resilience Simulator Individual Project · Python Llama 3 LangChain Autonomous Agents Docker • Autonomous Llama 3-powered agent monitoring system health, detecting anomalies, executing self-healing actions. • Built agent loop using LangChain with custom tool-use and self-healing action framework.	2025

EDUCATION & CERTIFICATIONS

B.Tech – Artificial Intelligence & Data Science VSB Engineering College, Karur · CGPA: 8.2 · Coursework: DSA, DBMS, OOP, ML, Cloud Computing	2023 – Present
Higher Secondary (12th) – State Board Percentage: 76%	2023
Secondary School (10th) – State Board Percentage: 100% (All Pass)	2021
SQL Fundamentals	Java Foundation
AI Primer	Python for Data Science

ACHIEVEMENTS

- Winner – SeedStart Hackathon, CIT Chennai: Most innovative solution among all competing teams.
- Cash Prize – HackerEarth × NASSCOM Hackathon: Outstanding ideation and business impact.
- Award for AI Web Building: Excellence in building production-ready AI-powered web applications.
